April 25, 2018

To whom this may Concern;

Summit Builders entered into an agreement with Atlantic Safety Centre Inc. in the fall of 2013 for Safety Support with COR Certification documentation, safety plans, site visits and inspections. From the beginning Mike White, SET, CRSP was the safety consultant assigned to our company. We have found Mike to be very familiar with the Construction Industry and very knowledgeable about all things safety. Mike has been supportive of our safety program and has assisted with updates as legislation and requirements have changed. He approaches our employees and sub-trades in an instructive manner rather than an adversarial manner when safety concerns need to be addressed. This approach helps ensure compliance and reinforces our safe work environment. Mike assists our own employees lead Tool Box Talks and Inspections so that ultimately we perform them and thus better learn from the activities. Mike has been an invaluable safety resource for Summit Builders over the past four and a half years.

We have also had occasion to take training courses from Mike. The courses have been informative and applicable. Mike is always able to relate training to real life activities on a job site.

We would certainly recommend Mike to anyone seeking a consultant for their safety program. Mike will be a tremendous asset whether just setting up a safety program, tweaking an existing safety program or helping with the ongoing aspects of a safety program including training.

We plan to continue to make use of Mike's services as he transitions to his own company. We wish him every success with Mike White Safety Consulting.

Sincerely,

A handwritten signature in blue ink that reads "Andrew Butt". The signature is fluid and cursive, written over a light blue circular watermark.

Andrew Butt
